9TH - 12TH GRADES

- Notebook paper
- Binder with 6 dividers
- Pencils/pens
- Access to a bible, physical or digital

TECHNOLOGY TIP: SET YOUR STUDENT UP FOR SUCCESS!

As part of our hybrid model, students will attend live online classes four days a week—so having a reliable internet connection and a distraction-free workspace is essential. Before school begins, take a few minutes to check your home internet speed. A download speed of at least 25 Mbps is recommended to support smooth video conferencing. You can run a quick speed test at [speedtest.net](https://www.speedtest.net) or by searching "internet speed test" in Google.

Choose a spot in your home where your student can:
Hear and be heard clearly on Google Meet
Sit comfortably at a desk or table
Stay focused without loud noise or interruptions
Keep their school materials organized and close by

A little preparation now goes a long way in helping your student thrive in online learning!
